

VK LOGIC

MAINTENANCE ENGINEER

VK Logic is a rapidly growing company based in Howlong specialising in Integrated Automation, Electrical and Engineering Services. We are looking to appoint an experienced Maintenance Engineer.

Reporting to the Maintenance Manager your responsibilities would include:

- Plan, execute and improve customer maintenance strategies to maximise uptime, optimise costs and reduce risks.
- Implement and manage continuous improvement and modern manufacturing principles. Monitor plant replacement and maintenance programs and look for efficiency gains and cost savings.
- Plan equipment upgrades and machinery modifications, including coordinating the ordering and installing of replacement parts. Perform post maintenance checks to ensure all systems are in working order.
- Plan and manage projects and scope of works, including supervising and supporting the mechanical maintenance team.

To be successful in this role you must have the following credentials:

- Tertiary qualification in Mechanical Engineering or Process Engineering including previous experience in Engineering or an Australian recognised Mechanical Trade Certificate/Qualification and at least 5 years of relevant experience in a similar role.
- A strong commitment to WHS and an awareness of health and safety legislation. Experienced in ensuring all works are completed in a safe and compliant way following policies and procedures.
- Highly developed leadership and managerial skills encompassing business acumen with proven ability to make sound judgements.
- Excellent communication skills, both written and verbal.
- An understanding of engineering drawings and principles.
- Experience with Computerised Maintenance Management Systems.
- Current Australian driver licence.

On offer is the opportunity to advance your career in a fast growing and dynamic company that is locally owned and operated, excellent remuneration package and a great team environment that rewards you for your efforts.
